1**INTRODUCTION**

This deliverable provides an overview of materials and activities developed from Month 18 to Month 42 (February 2022-November 2023). For previous materials and activities, please refer to Deliverable 6.7.

Following the COVID pandemic, where the ENPOR dissemination and communication took place predominantly through online events, meetings and other engagement activities that were taking place online, while events were started to be organised face-to-face in 2023. Nevertheless, the pandemic transformed the way the project dissemination and stakeholder engagement as well as communication was first envisaged and due to the availability of stakeholders, several events originally envisaged to be organised face-to face, in connection with project meetings, were kept as online events. The digital channels of the ENPOR project have been used extensively and regularly. The format of the “Lunch Talks” was developed to be able to engage stakeholders with ENPOR outcomes but also to ensure continuous exchange to build up policy support for the work done in ENPOR. Once the online Lunch Talks series was finished, and ENPOR moved on to organised capacity building events and webinars, the format of the Lunch Talks was picked up by the Energy Poverty Advisory Hub and continued to make impact on the European stakeholder level.

The frequency of the ENPOR newsletter has been enhanced by special issues and social media channels are ensuring digital engagement. Digital banners, videos, online presentations and infographics were produced that accompanied policy events such as the Pcompolicy Forum, Lunch Talks, Thematic Seminars (capacity building events) policy events and more, from September 2021 to November 2023.

2

ENPOR DIGITAL MATERIALS

2.1 Newsletter

The newsletter is based both on the project content and on an ongoing call for articles that is circulated every 6 months and posted continuously on the ENPOR website. The newsletter runs various columns. The main feature is dedicated to **ENPOR content**, news, and deliverables/reports. It is followed by a **feature article**, mainly focusing on themes related to ENPOR, such as the background or elaboration of ENPOR policies. The feature articles are followed by **community** and **partner news** and a **resources** section for scientific articles. **Special issues** are dedicated to single important ENPOR calls, such as the call to fill in questionnaires, calls to participate in events or announcements. All newsletters are available on the project website: <https://www.enpor.eu/newsletters/>.

The ENPOR newsletter subscriber list counts **266 subscribers**, the ENPOR Lunch Talks subscriber list had **131 subscribers**, **altogether 397 Subscribers** received regular news from ENPOR via mailing lists. The newsletter was furthermore distributed to **2000 recipients by ENEA**. **ENPOR news were distributed via partner newsletters reaching 13,206 recipients, thus ENPOR news reached altogether 13,598 recipients exceeding the KPI of 5,000 recipients, reaching 272 % of the targeted value.**

1st Newsletter

The first newsletter was sent out on 17.03.2021 to **91 subscribers** and **2,000 subscribers** of ENEA's Energy Efficiency Newsletter list and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=193>.

2nd Newsletter

The second newsletter was sent out on 25.08.2021 to **181 subscribers** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=229>

Content

- **Main Feature:** „Stakeholders Improve National Policies Together to Fight Energy Poverty in the European Private Rented Sector”
- **Events:** „Energy Poverty: Why is it important and how can municipalities fight it?” | „ENPOR Policy Forum” | „Announcing the ENPOR Lunch Talks”
- **New Research Results:** Report: What Prevents Energy Efficiency Policy Implementation in the European Private Rented Sector?
- **Calls:** Share your stories for a social media campaign!
- **Guest Features:** „Fit for 55 and Energy Poverty: Will the new package help energy poor? - Guest Article by Zita Kakalejckikova, Habitat for Humanity International” | „Women Are Highly Affected by Energy Poverty, But Strong in Fighting It” - Guest Article by Dr. Lidija Živčič, Focus Association for

Sustainable Development

- **News from Sister Projects:** “Solutions to Tackle Energy Poverty: Lessons from STEP” | “SUITE-Scaling Up Innovation Together for Energy Vulnerability”
- **National Perspectives:** Greek Programme to Tackle Energy Poverty Should Be Directed to Households with Bigger Needs for Energy Upgrades | Spanish National Strategy Against Energy Poverty 2019-2024 in the Policy Debate
- **Blogs:** „Energy Poverty and The Role of Municipalities - By Helena Daum and Eva Suba, Climate Alliance” | „Building trust through communication: The social side of energy poverty by Madison Steele, HU University of Applied Sciences Utrecht”
- **New scientific papers:** Energy Taxation and Its Societal Effects | A framework for ‘right to energy’ to meet UN SDG7: Policy implications to meet basic human energy needs, eradicate energy poverty, enhance energy justice, and uphold energy democracy | The Role of the Ombudsman in Energy Poverty Alleviation
- **External Resources and Events:** EnAct/ENGAGER podcast | Minimum Energy Performance Standards Framework for Europe | Energy poverty at the crossroads of the European Pillar of Social Rights and the European Green Deal by the European Economic and Social Committee (EESC)
- Conference Social Innovation | Webinar recording available: Tackling Renters’ Energy Costs in the US: How Local Governments Can Equitably Improve Efficiency

3rd Newsletter

The third newsletter was sent out on 17.02.2022 to **214 subscribers** and is available online here <https://nl-enpor.klimabuendnis.org/index.php?id=267>

Content

- **Main Features:** “Energy Poverty Dashboard Reveals Why The Private Rented Sector is Key When Fighting Energy Poverty” **In Depth:** How to Deliver Renovations in the Private Rented Sector: Greek and Estonian National Renovation Policy Improvements
- **Resources and Events:** VIDEO: The Dashboard and its Use” | “ENPOR’s Message at COP26” | ENPOR Co-organises the Europe Day of IEPAW | Policy Event in Greece: UIPI Renovation Tour continues in Athens
- **Let’s Talk: National Perspectives:** Italian “White Paper” – an Open Dialogue on Energy Poverty | Energy Poverty in Greece: Athen’s Socio-Spatial Perspective
- **Community News:** Minimum Energy Performance Standards: Solution or Problem? Recording of the 3rd ENPOR Lunch Talk | EPAH Launches Its Call for Technical Assistance and Its First E-learning Course on Energy Poverty
- **News from Sister Projects:** “The ComAct Knowledge Exchange Platform” | “Wellbased Webinar On Energy Poverty and Health” | POWERPOOR EU Trainings | EMPOWERMED’s Gender Analysis in Albania
- **Policy Support:** Latest ENPOR Resources: | Policy Guide on the Energy Efficiency Directive and Energy Savings Obligation for Energy Poverty Alleviation | Summertime Energy Poverty | Policy Recommendations on South-East Europe’s Energy Poverty Aspects | Housing Europe’s “Impact of the Recovery Plans on the Social and Affordable Housing Sector” | WELLBASED’s Report on Public Policies and Interventions to Reduce Energy Poverty | Com-Act: How Renovation Measures Fight Energy Poverty for Energy Advisors | EMPOWERMED’s Energy Poverty and Gender Resources | The ENGAGER Toolkit for Frontline Workers |
- **EU Framework:** Tackling Energy poverty Through Local Actions – Inspiring cases from across Europe (Directorate-General for Energy) | Energy Performance of Buildings Directive Recast

Proposal | Recast of the Energy Efficiency Directive | Social Climate Fund | Right to Energy Coalition's List of Suggestions on the Recast of the Energy Performance of Buildings Directive (EPBD): How to alleviate energy poverty in the EPBD: in Google Doc Format

- **External Events:** International Day Against Energy Poverty in France: retrospective on the event

4th Newsletter

The fourth newsletter was sent out on 19.09.2022 to **247 subscribers** and is available online <https://nl-enpor.klimabuendnis.org/index.php?id=282> .

Content

- **Main Feature:** "Local Stakeholders' First Take on How to Tackle Energy Poverty in Rental Situations"
- **Let's Talk: National Perspectives:** Austrian ENPOR Measures in the Energy Crisis | The Netherlands: Research Yields Surprising Results about the Dutch Energy Box | Italy: ENEA Launches School Awareness Campaign on Energy Poverty
- **ENPOR RESOURCES:** CO2 Price Share Between Landlords and Tenants | Improving on National Renovation Grants | ENPOR at the 3rd International Conference on Energy Research and Social Science | Lunch Talk Takeaway: Tailored Measures for Energy Poverty | Lunch Talk Takeaway: Tackling Split Incentives
- **Community News:** European Week of Regions and Cities Workshop "Measuring energy poverty to ensure a socially fair green transition" | EUSEW Policy Session - Diversifying the energy transition: gender perspectives in energy poverty policies | Covenant of Mayors Workshop: Tackling the new energy crisis and energy poverty locally
- **News from Sister Projects:** Actions to Tackle Energy Poverty with Focus on Women in the Mediterranean | Getting the Best Deal for Consumers in the Energy Transition
- **Policy Support:** In Depth: Energy Poverty Coverage in EED and EPBD Recast Proposals | The Future Costs Under the Energy Efficiency Directive | Energy poverty increasingly affecting Germany's middle class | Energy Poverty Indicators and the Italian Social Economic Context | Energy Poverty in Central Eastern Europe | EPAH's Guide for Understanding and Addressing Energy Poverty | Geographical Disparities in Energy Poverty and the Spatial Impacts of Energy Policy
- **EU Framework:** Tackling Energy poverty Through Local Actions – Inspiring cases from across Europe (Directorate-General for Energy) | Energy Performance of Buildings Directive Recast Proposal | Recast of the Energy Efficiency Directive | Social Climate Fund | Right to Energy Coalition's List of Suggestions on the Recast of the Energy Performance of Buildings Directive (EPBD): How to alleviate energy poverty in the EPBD: in Google Doc Format
- **Scientific resources:** Energy poverty and emerging debates: Beyond the traditional triangle of energy poverty drivers - Ana Stojilovska et al. | The diversity penalty: Domestic energy injustice and ethnic minorities in the United Kingdom. Energy Research & Social Science 91 - Bouzarovski S, Burbidge M, Sarpotdar A, Martiskainen M | Decarbonisation of the Polish residential sector between the 1990s and 2021: A case study of policy failures. Energy Policy, 163: 112848. - Sokolowski J et al (2022)

5th Newsletter

The fifth newsletter was sent out on 16.02.2023 to **252 subscribers** and is available online <https://nl-enpor.klimabuendnis.org/index.php?id=293>

Content

- **Main Feature:** „Energy efficiency retrofitting should consider human lives and stories: ENPOR updates its report on energy poverty in the private rented sector”
- **Let's Talk: National Perspectives:** German ElectricitySavingCheck (Stromsparcheck) extends its heating advice | What is needed for a municipal approach 2.0 against energy poverty? | Save energy with ENPOR – New translations to reduce energy consumption
- **ENPOR RESOURCES:** Publication: How to improve energy efficiency policies to address energy poverty? Literature and stakeholder insights for private rented housing in Europe | Policy: Cities and towns set example in the fight against energy poverty: Climate Alliance members adopt resolution to mitigate energy poverty
- **EVENT HIGHLIGHTS:** The International Energy Poverty Action Week 2023 | Express your interest: ENPOR Capacity building event series | Energy poverty mitigation in Europe: Potential role for renewable energy communities - Registrations open
- **Community News:** The EPAH national indicators on energy poverty | People affected by energy poverty feel less healthy EmpowerMed shows | Rethinking energy efficiency in time of an energy crisis: Concepts, measures and on-the-ground initiatives towards just energy transition | POWERPOOR's Trainings and energy poverty alleviation offices expand | In-depth description of new and adapted financing schemes for application in the ComAct pilot cases | RENOVERTY kicks off: Time to put rural energy poverty on the map
- **BLOG** | Carbon price and energy poverty: The EU Emission Trading System (ETS) and energy poor households
- **EXTERNAL PUBLICATION:** Fuelwood use as a cultural practice to cope with energy poverty in Europe

6th Newsletter

The sixth newsletter was sent out on 16.02.2023 to **258 subscribers** and is available online <https://nl-enpor.klimabuendnis.org/index.php?id=302>

Content

- **Main Feature:** “What the Energy Poverty Dashboard Tells Us | Good Practices on Multigovernment Scale
- 5 Minutes Survey: Help us assess the gender dimension in energy efficiency policy!
- **Good Practices on Multigovernment Scale:** Co-designing engaging strategies for successful stakeholder engagement: the ENPOR Replication
- **ENPOR RESOURCES:** Good Practices Briefings – Reaching out to tenants in the PRS, energy advice, and quantifying the split incentive issue | Policy Event Recap: Tackling Energy Poverty Through National Building Renovation Plans - ENPOR's policy session at EUSEW 2023 | Scientific Publication: How to improve energy efficiency policies to address energy poverty?
- **EVENT HIGHLIGHTS:** REGISTER NOW: Methodologies and tools to quantify split incentives seminar | EPAH-ENPOR German National Event: Socially Just Climate Protection: Approaches for an Inclusive Energy Transition | SAVE THE DATE! ENPOR's final conference takes place on 16 November in Brussels
- **Community News:** Covenant of Mayors Workshop on Energy Poverty at the Grafting Cities Conference | Energy Poverty Advisory Hub Annual Conference | ENPOR at the EMPOWERMED Final Event | Building Energy Citizenship: Inclusive housing approaches for energy citizens and communities | ENPOR's Recommendations Included in the New Version of the German Practice Guide “Climate Protection in Municipalities”

2.2 Special Issues

Special Issue 1

The first special issue was dedicated to the “Forces and Barriers Survey” and sent out on 19.04.2021 to **153 subscribers**. It is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=214>

Special Issue 2

The second special issue inviting recipients to register to the energy poverty workshop was sent out on 5.8.2021 to **180 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=228>

Special Issue 3

The third special issue was dedicated to inviting recipients to attend the “ENPOR Lunch Talks” and was sent out on 16.9.2021 to **183 recipients**. It is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=239>

Special Issue 4

The fourth special issue was dedicated to the EUSEW Energy Talk and was sent out on 11.10.2021 to **185 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=242>

Special Issue 5

The fifth special issue was a call to “Register for the Energy Poverty Dashboard Launch” sent out on 28.10.2021 to **188 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=243>

Special Issue 6

The sixth special issue was: “MEPSs, Deep Renovations, Local Policy Support: ENPOR News Special Issue” sent on 22.11.2021 to **206 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=245>

Special Issue 7

The seventh special issue was: “ENPOR Lunch Talk 4 on Tailored Measures” sent on 22.03.2022 to **225 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=271>

Special Issue 8

The eighth special issue was: “Joint EPAH-CoM-ENPOR Lunch Talk” sent on 09.11.2022 to **374 recipients** and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=290>

Special Issue 9

The ninth special issue was: “ENPOR Lunch Talk 5 Split Incentives” sent on 22.03.2022 to 374 recipients and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=276>

Special Issue 10

The tenth special issue was: “The International Energy Poverty Action Week” sent on 10.02.2023 to 2398 recipients and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=292>

Special Issue 11

The eleventh special issue was: “Improved renovation policies reduce energy poverty” sent on 20.03.2023 to 392 recipients and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=296>

Special Issue 12

The twelfth special issue was: “ENPOR Thematic Seminars - Learn & Share” sent on 01.06.2023 to 396 recipients and is available online here: <https://nl-enpor.klimabuendnis.org/index.php?id=299>.

2.3 Partner Newsletters including ENPOR News

ENPOR newsletters and news were distributed also via partner newsletters **reaching altogether 13,206 recipients** over the course of the project. The following table demonstrates the type of information and the quantified outreach of the partner newsletters' impact. Please note, that the timeframe of the table includes newsletters that were sent by partners between February 2022 and November 2023. Previous newsletters are to be found in Deliverable 6.7 and include the timeframe September 2020-December 2021.

2.4 Digital Dissemination and Communication Materials at ENPOR events

A short overview presentation and a presentation to be used by the REACT Groups have been developed in PowerPoint format. A short presentation is for all partners to use when quick Videocalls require an overview about the project. The REACT Groups presentation is meant for REACT Group members to translate and adapt to their own purposes. These two presentations were detailed in D6.4.1 and served as a basis for the upcoming presentations. The following presentations were developed after the submission of D6.4.1.

Beyond presentations at events, the ENPOR partnership was engaged in co-organizing both the **2022 and 2023 International Energy Poverty Action Week**. While the first event was focusing on initiations and actions that change the possibilities and opportunities of energy efficiency measures for energy poor households, the second event was more focused on exchange and spreading the main ways to reach policy change.

In 2022, [ENPOR's Europe Day Presentation](#) of the International Energy Poverty Action Week "Taking Action and Measuring its Impact" was recorded and is available: https://www.youtube.com/watch?v=b4y9orb_x7

↓

In 2023 the recorded contribution is available on the IEPAW's Youtube channel:

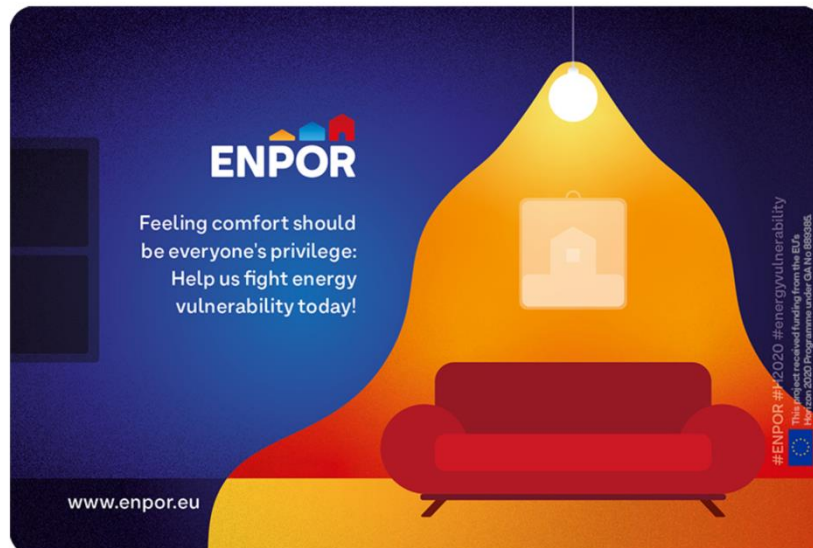

<https://youtu.be/Q-ZcmLaYfa4?si=-YEQXG9FcQfhaFcD>

Due to the pandemic, most events were held online up to early 2022. As REACT Group meetings were reserved for the specific country's stakeholders following the Stakeholder Engagement Strategy, the project partners decided to extend the original plan and organize a series of online events to enable exchange of experiences and information among the various countries' stakeholders and networking partners interested in our results. The events were online Lunch Talks, in detail reported in previous Dissemination and Communication deliverables. The below list contains the main source of information for these events:

- **Presentations of the First Lunch Talk: Energy Poverty in the PRS – Barriers and Solutions:** Available online at the event page: <https://www.enpor.eu/event/registration-open-first-lunch-talk-energy-poverty-in-the-prs-barriers-and-solutions/>
- **Presentation and Demonstration of the Energy Poverty Dashboard: Lunch Talk 2:** Recorded and published on the ENPOR Youtube Channel
- **Recording of the Third Lunch Talk: Will Fit for 55 help the energy poor?:** The recording is published on the ENPOR Youtube Channel: <https://youtu.be/zpqCRoKktWE?si=oYLQwxIX1gycCDr7>
- **Recording of the Fourth Lunch Talk: Tailored Measures for Energy Poverty:** The recording is published on the ENPOR Youtube Channel: https://www.youtube.com/watch?v=zU_fLv2xxzw
- **Materials of the Fifth Lunch Talk: Tackling Split Incentives: A European Outlook:** A post-event brief summarizing main takeaways is downloadable here: <https://www.enpor.eu/wp-content/uploads/2022/06/5th-ENPOR-Lunch-Talk-Brief.pdf> | The recording is published online: <https://www.canva.com/design/DAFDHHvldYo/watch> | The presentations are available for download: [Presentation](#) of Greek case by Christos Tourkolias, The Centre for Renewable Energy Sources and Saving | [Presentation](#) of German case by Florin Vondung, Wuppertal Institute for Climate, Environment

2.4.1 The Policy Forum Presentations

Save the Date | ENPOR Policy Forum

Dear Colleagues,

Thank you for accepting the [ENPOR Project](#)'s invitation to be part of our Advisory Board. We are happy to see a broad variety of stakeholders represented around the table.

The ENPOR Project partners will organise the second Advisory Board meeting and Policy Forum

on the

2nd of September 2021, 15:00 to 16:00 CET | ONLINE

The Policy Forum was organised on a yearly basis in an online format via Zoom. The Agenda and invitation was sent via E-mail to the Advisory Board members. The invited group was extended for the final event, as the Policy Forum was merged into the Validation Workshop, thus setting up an online validation event with 2 parts of altogether 3,5 hours, where the first part was focusing on the policy recommendation aspects and the second part was focusing on the validation of results with REACT Groups. This way, a smooth validation experience was created for both policy and implementation and validation aspects offering also the opportunity for both the practitioner and policy maker group to interact with each other.

Presentation at the ENPOR Policy Forum 1:

All presentations of the Final Policy Forum and Validation Workshop

Impulse Talk: Summary of WP2 Research: https://www.enpor.eu/wp-content/uploads/2023/11/2_Bouzarovski_Forum_Validation-WP2-summary.pptx

Co-creating policy measures: https://www.enpor.eu/wp-content/uploads/2023/11/3_Vondung_ENPOR_Validation_Webinar_policy_outcomesx.pptx

Findings and Insights from REACT Group meetings:

https://www.enpor.eu/wp-content/uploads/2023/11/4_Bouzarovski2_Validation-REACT-summary.pptx

REACT GROUP FINDINGS PER COUNTRY

Policies focusing on training

<p>REACT Group in Austria</p> <ul style="list-style-type: none"> • In Austria, tenants have the opportunity to improve their own living situation to a certain extent • Hence, there's a need to have easy-to-implement and cheap solutions • New formats were created to support <u>households experiencing energy poverty</u> in a targeted manner • Results: <ul style="list-style-type: none"> • New training format developed for energy advisors • Energy poverty coordination office established in Austria 	<p>REACT Group in Italy</p> <ul style="list-style-type: none"> • In Italy, national programmes for information and training practices were considered • During REACT group meetings: <ul style="list-style-type: none"> • Methods for making information more available to energy poor households were discussed • Currently available tax deduction schemes were illustrated to citizens • This resulted in: <ul style="list-style-type: none"> • Energy poverty being more relevant in the <i>Italia in Classe A</i> programme • Continuation of communication and training actions regarding energy poverty and efficiency in Italy
--	--

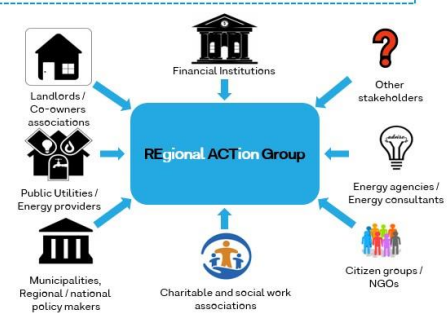

Replication opportunities and challenges:

https://www.enpor.eu/wp-content/uploads/2023/11/5_ENPOR-Validation-event-EDO-final.pptx

ENPOR CO-DESIGN MODEL - Benefits of policy co-creation

1. Remove organisational barriers
2. Make use of different stakeholder perspectives and resources to enable innovative solutions
3. Include target groups to ensure design is tailored to their needs
4. Increase policy legitimacy among target groups and other stakeholders
5. Facilitate data collection for impact monitoring

To carry out the co-creation process in ENPOR, partners have established a specific group of stakeholders called **Regional Action (REACT) groups**.

2.4.2 Capacity building seminar videos

For the capacity building seminars (or thematic events) announcement videos and recordings were produced. The announcement videos were posted on social media and are embedded on the webpage of the respective event.

Example of announcement video embedded:
<https://www.enpor.eu/event/june-15-2023-enpor-presents-insights-and-innovations-in-energy-advice/>

[15.06.23] ENPOR presents: Insights and Innovations in Energy Advice

The aim of the event, targeting policy makers, energy advisors, consultants on sectors where energy is now also gaining importance (e.g. also social sector), is to present various measures from the project that have contributed to energy advice for energy poor households in the PRS. The focus of the seminar is on disseminating the methods implemented and our new concepts.

Recordings:

DIGITAL MATERIAL AVAILABLE ON WEBSITES

Various digital material were developed, to engage stakeholders and to communicate and disseminate target group relevant ENPOR results.

3.1 ENPOR Website

<https://www.enpor.eu/news/>

The website informs and engages stakeholders around ENPOR related results and activities. The content management strategy follows the idea of directing traffic to ENPOR content and keeping stakeholders engaged with an interesting and structured presentation of project outcomes. Information on ENPOR related outcomes and content is displayed in the News section divided in blogs/ articles, general content and events. A special section is dedicated to the [Energy Poverty Dashboard](#), the [Split Incentive Tool](#) and to ENPOR public results under the [Knowledge Hub](#).

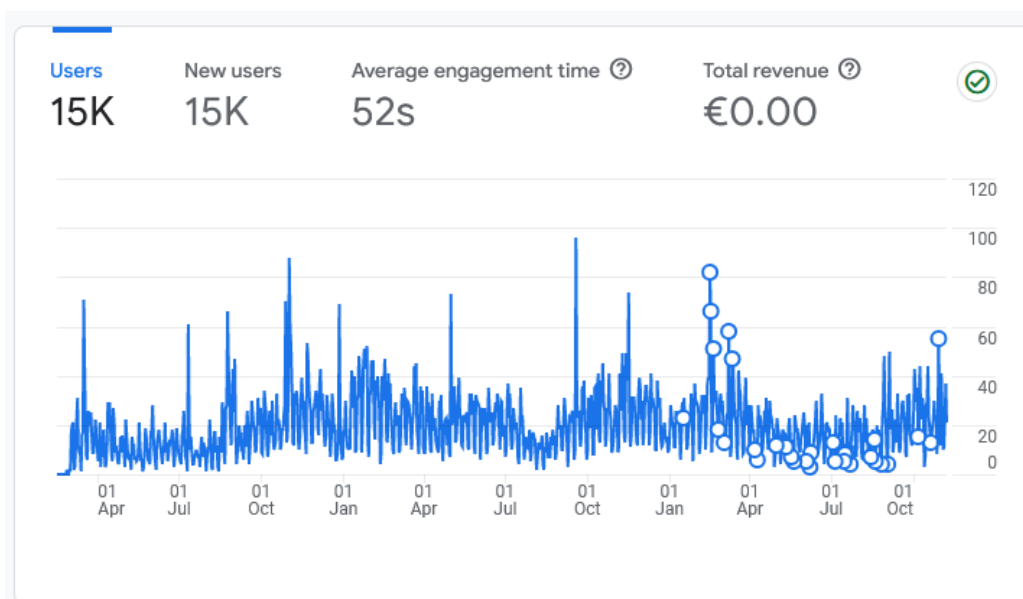

Calls for Actions were posted in the slider to direct visitors to the relevant subpage. Important networking partners such as the Energy Poverty Advisory Hub, and later the Covenant of Mayors information is also posted. Blog posts deliver detailed context on interesting ENPOR results, such as the REACT Group interim findings. The ENPOR newsletter's concept also follows the idea of elaborating short news items in longer articles via the ENPOR website. The main

ENPOR news were posted via the News, Events menus and via social media mixed up with blogs, guest articles and events to keep the readers interested throughout the project. To scroll through the News menu, click here: <https://www.enpor.eu/news/>.

Events were announced on the website, to then be posted on social media. These events were ENPOR events or event calls for external events where ENPOR was co-organising or presenting: <https://www.enpor.eu/events/>. Event subpages contain relevant external information, such as links to registration, background information, links to resources, publications and recordings of the events (eg: [ENPOR Lunch Talk – Energy Prices Skyrocket in Europe: Will Fit for 55 help the energy poor?](#))

The ENPOR website has a high level of online engagement with **42,232 views** and a total user engagement of 32,323. From February 2021 to November 2023, the website has experienced remarkable growth, with the number of users reaching an impressive 15,000. This increase over the period highlights the popularity of the platform and the effectiveness of the project. Looking at global engagement, the statistics show that the United States leads with 1,500 users. **Italy, Germany and Spain follow with 1000 users each. The Netherlands, Greece and Mexico each contribute around 700 users, reflecting a consistent level of interest across different geographical locations.** There are also users in China and Colombia with 200 users, demonstrating the global reach of the project. The diverse and widespread user base underlines the international attention given to energy poverty. Analyzing the sessions by default channel groups shows that the highest search is direct to the website with 13,000 sessions, indicating a strong presence in search rankings and relevant content. Direct entry via the website URL with 5,300 sessions shows a high level of user awareness of the project. The access to the website from external platforms, with 1,400 sessions, shows a successful content collaboration with external entities. **The online engagement with the events published on the ENPOR website shows a high level of interest. In total, there were 42,000 views on 25 events. In particular, the event "ENPOR - Energy Poor Households in the Private Rented Sector" has attracted a lot of attention with 13,500 views from 7,000 users. Secondly, the "Energy Poverty" event reached 5,000 views by 2,500 users. In total, ENPOR published a lot of news on its website with more than 400 posts in the period 2021-2023 to keep readers informed.** The article "Energy Poverty and the Role of Municipalities" on the Climate Alliance website in June 2021 received a lot of attention with more than 500 views.

3.1.1 Blogs, videos by ENPOR Partners on the website

The blog format of the ENPOR webcontent aims to elaborate on one focus topic. Each partner was planned to contribute at least 2 blog posts, thus aiming to engage target groups from all over the ENPOR policy countries as well as European stakeholders. Blog posts have been also included in the newsletter and posted on ENPOR social media.

3.2 The Energy Poverty Dashboard

The EPD serves as a platform for stakeholders and policymakers to assess the success and failure of policies. The information and action hub, decision-support and public engagement tool all at once, provides customised new data in a user-friendly format while also offering affected stakeholders information on relevant initiatives, collaborations and forms of support and is hosted by The University of Manchester:

<https://www.energypoverty.info/energy-poverty-dashboard/>

The Energy Poverty Dashboard consists of 2 elements:

- Online maps to show the geography of energy poverty in the rented sector- and where available the PRS more specifically. The maps help visualise data at the national, regional and (where possible) sub-regional scale using datasets from EU-SILC, EU EPOV, and censuses and household budget surveys;
- An interactive map of policies related to energy efficiency in the PRS, including ENPOR ones. The map provides a visual record of relevant organisations operating at a variety of scales, with a range of geographical scopes. The interactive map allows local agencies providing on the ground support to help connect vulnerable households to relevant policies and provide a participatory platform for all stakeholders, in particular the national REACT Groups, to share experience of the policies and engage in local decision-making with regards to energy efficiency.

ENPOR released a [video tutorial](#), a [user guide](#) and an [infographic](#) to support the use of the Dashboard.

ENPOR
The ENPOR Energy Poverty Dashboard:
An energy justice information and action hub

WHAT IS THE EPD?
The Energy Poverty Dashboard is an integral part of the ENPOR project, which seeks to provide an in-depth examination of energy poverty policies for the Private Rented Sector (PRS) across the European Union (EU).

- Provides a pan-European platform for the spatial visualisation & quantification of energy poverty patterns in the PRS across the EU
- Provides associated actions to address the issue
- Responds to the lack of EU-wide data on the PRS
- Responds to the need for spatial and temporal disaggregation of relevant information & interventions.
- Establishes an online space for sharing knowledge and good practice.

2 ELEMENTS
Online maps to show the geography of energy poverty in the rented sector, and, where available, the PRS more specifically. The maps will help visualise data at the national (where available), regional and sub-regional scale using datasets from EU-SILC, EU EPOV, and Censuses and Household Budget Surveys.

11 INDICATORS
123+ POLICIES
29 COUNTRIES

REPI INDICATOR **<<**
Rented Private Housing Energy Poverty Indicator (REPI) is a specialised multidimensional indicator to capture energy poverty in the PRS. REPI consists of a composite energy poverty indicator weighted by the proportional size of the PRS in a given area.

>> STEPP INDICATORS
To complement the energy poverty indicators and to inform on the extent to which energy poverty in a country is localized in the PRS, a novel set of indicators reflecting the Share of Tenants in the Energy Poor Population (STEPP) according to the respective energy poverty indicator is calculated.

DATA QUALITY & ACCESS
In addition to the indicators, the dashboard displays information on the underlying sample size and statistical significance of differences between the overall population and the (private) rented sector. All displayed statistics are available for download.

Access to the Dashboard!

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 889385.

3.3 The Split Incentive Tool

The ENPOR Split Incentive Quantification Tool – allocates the costs and benefits of energy efficiency interventions for landlords and tenants. The tool contributes to a deeper understanding about how to tackle energy efficiency in the private rented sector and aims to identify the share of the triggered benefits from the implementation of energy efficiency interventions between landlords and tenants in order to quantify the appropriate allocation of costs or subsidy rates for both sides, towards specific energy efficiency scenarios in several geographical/national contexts. ENPOR developed:

- [this tool in Excel Format](#),
- [a user guide](#),
- released a [briefing](#) and
- [organised an event where the tool was presented](#).

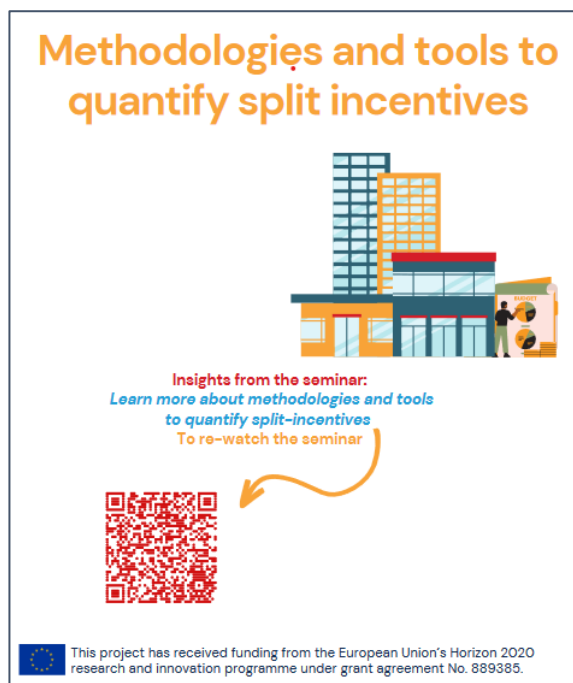

3.4 Briefings – Thematic Seminar Summaries

In the past months, ENPOR organised capacity building events, sharing learnings from the project under specific topics. In order to ease the life of people who couldn't join – and even those who could! – IEECP has gathered key findings and highlights from the presentations into [short visual briefings](#):

- [Best practices for reaching out to tenants in the private rented sector](#)
- [Examples from quantifying the split-incentive problem in the private rented sector at national level](#)
- [Offering energy advice to low-income households: best practices](#)
- [Methodologies and tools to quantify the split incentive](#)
- [Connecting energy poor communities](#)

3.5 ENPOR Content on Partner Websites

Partners of the ENPOR Consortium posted information on ongoing actions along the timeline of the project. The Table below summarises the content and includes direct links to the respective content. **Alltogether 13,116 reads** were counted (where available) to date for ENPOR-related content.

4

SOCIAL MEDIA

The social media and digital events material were always developed according to the content requirements of the individual events, news, highlights. Social Media campaigns were focusing on the dissemination of current results and launch events related to project results. Facebook and LinkedIn are mainly used to post ENPOR related information, while Twitter is a more interactive medium. In the last period of the project, posts focused on results, publications and Thematic Seminars bringing results close to the stakeholders. All ENPOR activities and project outcomes are distributed via social media, implementing the strategy of directing visitors to ENPOR materials and achievements via the website, online events or publications. Sister project events, stakeholder activities such as the EPAH and Covenant of Mayors related activities are also highlighted aiming to enhance a multiplying effect. Partners reposted/retweeted ENPOR content to reach national stakeholders.

4.1 ENPOR's Twitter Channel

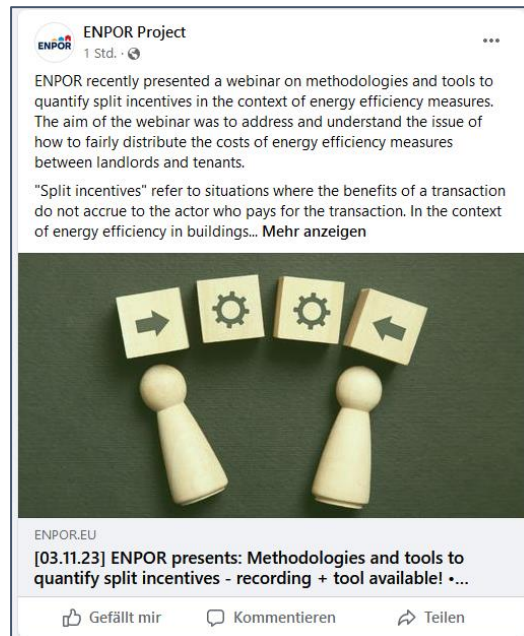

The best performing social media channel for ENPOR is Twitter. While it is also the most volatile and quick-paced, it provides the highest interaction rates for ENPOR, as its hashtag tool efficiently creates a community of profiles active in the same fields, while providing a tool for public awareness-raising on the same topic. In the case of energy poverty, this is a very powerful characteristic. With 516 tweets, the project channels **reached 85,185 Tweet impressions**, while the **501 followers** organically grew from 290 to 501 in the period of Month 18 to Month 42 (February 2022-November 2023) and **profile visits varying monthly between ca. 500 and 1200**. The highest activity was reached in the month of the ENPOR final event in the European Economic and Social Committee in Brussels, with over 600 impressions gathered. As a result **over 50 submissions to the Energy Poverty Dashboard** proves that our strategy works well in this setting. By looking into the statistics of Twitter, it becomes clear that high activity around events and project result launches provide higher target group reach than interactions, however this is due to the nature of the results of the first period of the project. In the second part of the project, when the recommendations of the REACT Groups become public, we expected higher engagement rates of partners and networking partners to reach higher policy impact as well.

ENPOR's Twitter Channel: <https://twitter.com/EnporProject>

4.2 ENPOR's Facebook Channel

The Facebook channel of the project was added to the originally planned two-channel strategy (Twitter and LinkedIn). The posts on Facebook engage the least, taking into account the adverse effect of public institution's engagement with the channel due to GDPR issues. Nevertheless, the project channel reached altogether interested stakeholders **2,680** times in the last 18 months, although with low interaction rate (as expected), triggering 295 direct page visits. Facebook Analytics show that spikes of activity on Facebook correspond with ENPOR events or publications. Towards the end of 2023, the density of activities increase, confirming the strategy of building awareness on ENPOR's work with frequent event activity.

ENPOR Facebook Channel:
<https://www.facebook.com/ENPOR-Project-107020977860481>

4.3 ENPOR's LinkedIn Channel

The second most successful social media channel for ENPOR has proven to be LinkedIn. With experts being active in the fields related to energy poverty, this channel brings high interaction value. Looking into the statistics of visitors, the dynamics follow the dynamics of Twitter interactions, where events and result launches create most interest in time. LinkedIn Statistics as in 2023: 14,100 post impressions | 10/5/2021-11/1/2023: 36520 post impressions (clicks and views).

ENPOR's LinkedIn Channel: <https://www.linkedin.com/company/enporproject>

It is worth to mention, that LinkedIn provided the most dynamic new follower metrics, with a rising value over the latest months. Currently the project **page counts 447 followers**, all won organically.

4.4 ENPOR's Youtube Channel

Youtube was added to the social media channels out of necessity to share videos produced as dissemination materials for ENPOR outcomes, such as the introduction of the Energy Poverty Dashboard. Currently 6 videos are available on the channel, counting **322 views**.

ENPOR's Youtube Channel: <https://www.youtube.com/channel/UCdVvk-dc3STEQigCcJ-NrzcA>

4.5 Partners' Social Media

Extensive social media activity has been accompanying ENPOR actions thanks to the engagement of partners active in the Dissemination and Communication Working Group. Altogether **over 434 Posts were read over 154,507 times (post reach and followers or group members)**. Various partner social media channels have

been supporting ENPOR activities in the past three years.

A full list of over **434 posts** with direct links and statistics is available in the Annex of this deliverable. The Social Media channels regularly posting on ENPOR activities are listed below:

NEW PRINTED ENPOR MATERIALS

5.1 Austrian Energy Agency: Energy saving measures– in 10 languages

New visual aid formats were created to support energy poor households in Austria. DIE UMWELTBERTATUNG has been offering energy counselling for energy poor households in the target region of Vienna for many years. The Austrian Energy Agency initiated the co-operation with DIE UMWELTBERTATUNG within the framework of the co-creation process in the Austrian ENPOR REACT group, to bring the greatest added value to advisory services for affected households. The stakeholder consultation and co-creation process in the REACT group led to revise already existing information materials on saving energy in private households and to create new advisory materials. These materials differ from previous offers by focusing on visual language, thus offering a clear advantage for this hard-to-reach target group by conveying information with as few words as possible using illustrations and pictograms. This communication method makes it easier to overcome language barriers or lack of background knowledge. The materials were translated into several languages to facilitate access for socially disadvantaged groups, especially with migration background. All versions were published on the ENPOR website printed in Austria, financed by the Ministry for Climate Action, and provided freely to energy and social advice services nationwide. They can order the factsheets for free in all the available languages. **Over 130,000 factsheets have been distributed this way in Austria already.**

Heizkosten sparen im Winter

1 °C weniger Raumtemperatur sind 6 % weniger Heizkosten.

TEMPERATUR ABSENKEN
Thermostate in der Nacht auf 17 bis 19 °C (Stufe 2) einstellen spart bis zu 10 % Heizkosten.

HEIZKÖRPER FREIHALTEN
Möbel und Vorhänge vor der Heizung verursachen bis zu 12 % mehr Heizkosten.

RICHTIG LÜFTEN
Am besten regelmäßig 2-5 Minuten Querlüften ...
... oder regelmäßig 5-10 Minuten Stoßlüften.

FENSTER UND TÜREN DICHTEN
Tür- und Fensterfugen abdichten.
passendes Dichtungsmaterial verwenden.

Wie warm heize ich meine Wohnung?
Thermostastufe
5 → 26 °C
4 → 25 °C
3 → 24 °C
2 → 23 °C
1 → 22 °C
* → 21 °C
* → 20 °C
* → 19 °C
* → 18 °C
* → 17 °C
* → 16 °C
* → 15 °C
* → 14 °C
* → 13 °C
* → 12 °C
* → 11 °C
* → 10 °C
Frostschutz

3 gute Gründe für's Lüften:
→ Schimmel vermeiden
→ Entfernen von Schadstoffen
→ Gesundheit erhalten, frische Atemluft

Wie vermeide ich Schimmelbildung?
→ Fenster nicht kippen; die Mauern kühlen aus; bringt wenig Frischluft.
→ nach dem Kochen und Duschen immer lüften.
→ Möbel nicht an Außenwände stellen.
→ undichte Fenster und Türen dichten.

5.2 Wuppertal Institute: German Electricity Saving Check (Stromsparcheck) materials

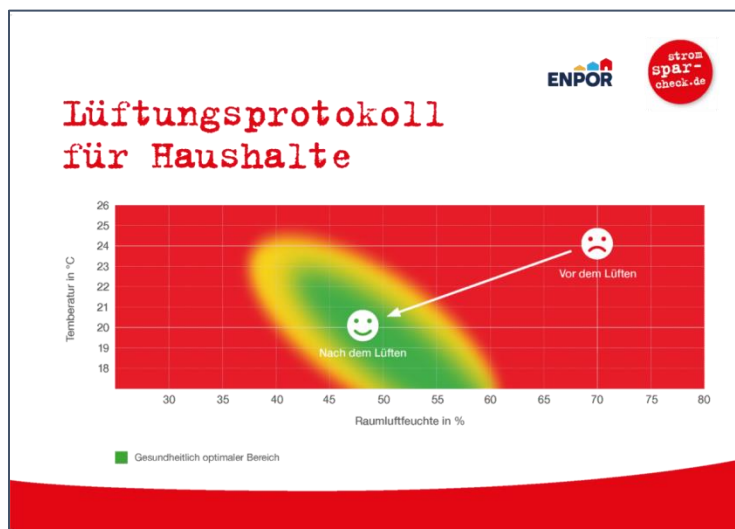

Within ENPOR, our overarching aim was to further develop the existing approach of heating-related energy advice to increase heat savings and achieve better comfort level and to broaden the evidence base of what works. We partnered with Caritas Düsseldorf to further develop innovative approaches to be able to convey energy advice more effectively or to achieve savings by means of new tools and approaches. The Wuppertal Institute, Caritas Düsseldorf and Röthele Energie- und Bauberatung, analysed the existing StromSparCheck advisory process and practice and developed a new **media package to support the advice delivery**:

Ventilation information sheet: The ventilation sheet is one element of the developed media package. It shows the air circulation for four different ways of ventilation: shock ventilation, cross ventilation, tilt ventilation with door open and door closed. Using this illustration of 4 rooms, with blue and red arrows for fresh and stale air, and a related evaluation system with red stars where a maximum of 5 stars shows the optimum way of ventilation, the measure is meant to improve the information transfer and impacts of different ventilation

methods by graphic display, which could accommodate not only target groups that have difficulties with the native language. The laminated sheet has been originally used for the training of the programme’s energy advisors but is now handed-out to the visited energy-poor households as an easily understandable guide to ventilation in the heating season. **Download ventilation guide:** https://www.enpor.eu/wp-content/uploads/2023/02/Ventilation_guide.pdf

Ventilation diary: Another element of the media package is a recording sheet with diagrams for temperatures and air humidity for various ventilation methods that is being handed out to the household together with a thermohydrometer. The household is asked to document measured temperature and relative humidity values from the thermohydrometer, before and after ventilation, using different forms of ventilation over a period of a week. Different colours in the diagrams, supported by embedded emojis, signal to the user where optimal and non-optimal combined values lie from a health perspective.

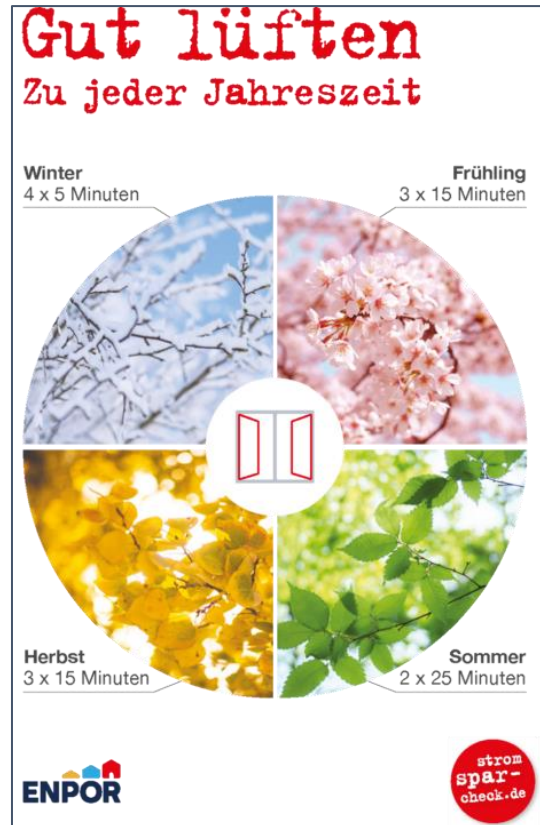

The aim of the diary is to strengthen the understanding for the issue, the impact of ventilation on indoor air

quality and interlinkage to personal well-being as well as promote the literacy with view to reading and understanding the displayed values on the thermohydrometers. **Download ventilation diary:** https://www.enpor.eu/wp-content/uploads/2023/02/Ventilation_diary.pdf

Close-to-action visual reminders: As a last part of the media package, the improvement comprises 1) transparent window stickers out of adhesive foils with ventilation instructions for the different seasons in terms of frequency and duration and 2) printed hangers for radiators with information on the thermostats settings and the corresponding temperature levels. Placing these reminders close to the action they advise on shall serve the tenants as a reminder and support the continuous implementation of contents of the energy advice. **Download** Window sticker and radiator hanger:

https://www.enpor.eu/wp-content/uploads/2023/02/Window_sticker.png

https://www.enpor.eu/wp-content/uploads/2023/02/SSC_Radiator_hanger.png

5.3 ENEA: ENPOR guidebooks

In the framework of the ENPOR project activities, and with the aim to provide information and recommendations to citizens on how to reduce energy consumption and energy bills as well as to increase the adoption of energy efficiency measures, ENEA – the Italian agency for new technologies, energy and a sustainable economic development, has elaborated 2 guidebooks dedicated to owners and tenants and to building managers – in Italian.

ENPOR guidebook for building managers: communicating and disseminating the benefits of energy efficiency interventions to reduce energy consumption:

<https://italiainclassea.enea.it/filesystemMedia/1/2023/09/adda1a06c33aab15dee06dd8c8852ee1.pdf>

ENPOR guidebook for tenants and owners: how to reduce energy consumption and make your house more energy efficient:

<https://italiainclassea.enea.it/filesystemMedia/1/2023/09/d09106e48fc88b3ab2699e4a102cd9cc.pdf>

5.4 IEECP: ENPOR Poster for the CINEA Contractor's Meeting on Energy Poverty

The ENPOR Project was presented in Brussels on 17.04.2023 by the project coordinator at the Contractors' Meeting on Energy Poverty.

Actions to Mitigate Energy Poverty in the Private Rented Sector

Energy poverty remains at high levels in the EU due to increasing energy costs and slow progress on energy efficiency improvements. Despite the existence of various policies that directly or indirectly mitigate energy poverty in households, few policies address the phenomenon in the **private rented sector (PRS)**, despite its growing presence in the sector. The ENPOR project therefore aims to increase the capacity of decision makers to understand and mitigate its effects by **designing and implementing 10 policies in 7 Member States**, each tailored to the specific needs of the PRS.

Energy Poverty
 Private Rented Sector
 Split Incentives
 Policy Co-design

Success Factors

- Addressing the Private Rented Sector
- Tackling split incentives
- The creation of several tools
- Existing policies were modified to suit PRS
- Bottom-up work and co-design process via REACT groups

Stakeholders

REACT & Target Groups:

- Landlords & housing associations
- Tenants & tenant associations
- Citizen groups and NGOs
- Charities & social work associations
- Energy agencies
- Local, regional, & national policymakers
- Utilities
- Others (Research institutions, Real Estate Companies, Student Societies, Banks, etc.)

Uniqueness

- Niche market
- Quantifying the problem via STEPP & REPI indicators
- Customise policy responses in favour of PRS

Tools

Energy Poverty Dashboard (EPD) – A platform presenting relevant aspects of energy poverty in the PRS across a range of indicators, which can be used to investigate structural factors that underpin inequalities in the PRS. The EPD also provides novel methods to collect and represent data on policies aimed at addressing the PRS, and provides a range of resources to alleviate energy poverty in the sector.

Split Incentives Tool – The tool calculates the investment split between landlords and tenants for energy efficiency interventions using the triggered benefits from the renovations

Barriers

- Lack of communications and connection between parties prior to the project
- Data availability (identifying energy poor households, consumption data for monitoring and evaluation)
- Adoption of measures (use of infographics, applications, materials, adoption of policies)
- Reaching tenants and ensuring measures are targeted towards them
- Budget to implement measures (private & public budgets)
- Administrative (complicated application procedures)

Target Areas & Measures

Country	Name of Scheme
Austria	Low-threshold, target group-specific consulting (training, soft measure)
Austria	Development of a concept for structural energy poverty mitigation measures (structural policy framework)
Germany	Heating-related energy advice (training and information)
Germany	Pre-paid metering EnergieRevolve (training and information)
Estonia	National reconstruction grant (grant for renovation)
Greece	Energy Efficiency Obligation Scheme (EEOS)
Greece	Energy upgrade of buildings (grant for renovation)
Croatia	National Programme for Renovation of Buildings (grant for renovation)
Italy	Training and Information Campaign (training and information)
Netherlands	Energy Box (programme support)

Interesting Facts

- The PRS faces a **greater risk of poverty** than the general population for any energy poverty indicator.
- The **inability to keep the home adequately warm** is highest across the Mediterranean region & South-Eastern Europe, particularly in **Bulgaria and Lithuania**.
- The greatest **arrears on utility bills** are in South-Eastern Europe, although **Mediterranean countries, the Baltics and Ireland** are also strongly affected for the PRS.
- **Nordic countries** face particularly **high risks of energy poverty**, both in the general population and the PRS.
- There is a high prevalence of **leaks, damp and rot** across Southern & Western Europe and the Baltics, with elevated rates in the **Portuguese and Hungarian PRS**.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 889385.

6.1 Energiebox – The Netherlands

Advertisement from Energy Box published in local newspapers et al., created for the municipality of Ridderkerk.

A front of doorhanger developed for energy coaches to be distributed at door-to-door visits, followed by the back of the doorhanger, with a small energy saving test to trigger awareness.

A poster from Energy Box, created for the municipality of Utrecht in Dutch.

Two examples of multi-language communication: a poster developed by Energybox Amsterdam in Arabic, and another in Turkish.

Enerji Coach'un yakında kapınızı çalıp çalmayacağını bilmek ister misiniz?
QR kodunu telefonunuzla taramayı veya www.energiebox.org/amsterdam adresini ziyaret edin.
Enerji kutusu Amsterdam belediyesine tarafından size ücretsiz olarak sunulmaktadır.

هل تريد أن تعرف إذا كان مدرب الطاقة لدينا سيوزك قريباً?
تصفح www.energiebox.org/amsterdam أو اسأل مدربنا
بأن اسم المدرب الذي سيوزك قريباً من الطاقة لدينا.

Three examples of multi-language communication: a flyer developed by Energybox Amsterdam in Dutch, Turkish, and Arabic.

Eenvoudig geld en energie besparen met de gratis Energiebox

Wilt u minder geld uitgeven aan uw energierekening? Dat kan! Binnenkort is de Energiecoach bij u in de buurt. Deze coach geeft u tips om gemakkelijk minder energie te verbruiken. U krijgt ook een gratis doos met energiebesparende producten. Gemeente Amsterdam wil huurders helpen met energie en geld besparen en biedt u het advies en de producten gratis aan. U hoeft er niet voor te betalen.

Hoe werkt het?

 De Energiecoach belt bij u aan en geeft u de doos met energiebesparende producten.

 U krijgt tips over energiebesparing. De Energiecoach vertelt ook hoe u de producten uit de doos kunt gebruiken.

 Na het gesprek ontvangt u een e-mail met daarin het bespaaradvies en het bedrag dat u daarmee kunt besparen.

Ücretsiz Enerji Box ile paradan ve enerjiden kolayca tasarruf edin.

Enerji faturanıza daha az para ödemek ister misiniz? Bu elbette mümkündür! Enerji coach yakında kapınıza gelecek. Bu coach size kolayca daha az enerji kullanmanız için ipuçları verecek. Ayrıca bir kutu enerji tasarruflu ürünler alacaksınız. Amsterdam Belediyesi, kiracılara danışmanlık ve ürünleri ücretsiz sunar. Bunun için hiç bir ödeme yapmak zorunda değilsiniz.

Bu nasıl olacak?

 Enerji Coach kapı zilinezi çalacak ve size enerji tasarruflu ürünler içeren kutuyu verecek.

 Enerji tasarrufu konusunda ipuçları alacaksınız. Enerji Coach ayrıca kutudan çıkan ürünleri nasıl kullanabileceğinizi de anlatacaktır.

 Görüşmeden sonra, ipuçlarını ve tasarruf edebileceğiniz miktarı içeren bir e-posta alacaksınız.

وقر المال والطاقة بسهولة من خلال Energiebox المجاني.

هل ترغب في إنفاق أقل على فاتورة الطاقة الخاصة بك؟ نعم ذلك ممكن! في الأسابيع القليلة القادمة ، سيؤور أحد مدربي الطاقة لدينا حيثك. سيقدّم لك المدرب منتجات توفير الطاقة مجانًا ونصائح حول كيفية تقليل استهلاكك للطاقة. باستخدام هذه المنتجات الموفرة للطاقة، ستوفر المال على فاتورة الطاقة الخاصة بك. تقدم مدينة أمستردام منتجات ومعدات مجانية للمستهلكين، لأن تدفع شيء مقابلها.

كيف يتم ذلك؟

 بعد الزيارة ستلقى بريد إلكتروني يحتوي على نصائح توفير الطاقة والشعاع المالي الذي يمكنك توفيره بالتابع هذه النصائح.

 ستلقى بعض النصائح حول كيفية تقليل استهلاكك للطاقة وكيفية استخدام المنتجات التي تلقيناها.

 سيقدّم مدرب الطاقة بقرع جرس الباب الخاص بك لتعطيك المنتجات الموفرة للطاقة مجانًا.

لمزيد من المعلومات ، يمكنك مراجعة موقعنا على الإنترنت: www.energiebox.org/amsterdam أو مسح رمز الاستجابة السريعة ضوئيًا.

وقر وسنحيا 100 يورو في السنة.

The final infographics designed for EnergyBox to be used by energy coaches as a visual aid to support their energy advice talks, in multiple languages.

ENERGIEBOX
Energiebesparing met tips

Met de tips hieronder is energiebesparing makkelijk. Door de tips met een X uit te voeren bespaart u de meeste energie. Meer informatie en een uitleg van de tips staan in het advies dat u later krijgt.

اقتصدوا الطاقة بكل سهولة بتتباع الخطوات التالية. بتتباع الخطوات التي امامها علامة X ستقتصد طاقة أكثر. معلومات و شرح مفصّل للخطوات في التقرير الّتي.

Gevel الوّاجهة

Laat de roosters voor de ventilatie open of zet het raam elke dag 5 à 10 minuten open
انثروا المكيفات مفتوحة أو افتتحوا النوافذ من 5 إلى 10 دقائق كل يوم

Installeer een brievenbusborstel en hang een gordijn bij de voordeur
ثبثوا فرشاة على الرسائل وعلقوا ستارة أمام الباب

Plak tochtstrips bij deuren en ramen die niet goed sluiten
سحبوا شرائط الطقس في الأبواب والنوافذ التي لا تغلق

Slaapkamer غرفة النوم

Verwarm alleen kamers waar iemand is en sluit de deuren
سخنوا المكيفات الهوائية عندما يوجد شخص في الغرفة واغلقوا الأبواب

Woonkamer غرفة الجلوس

Vervang uw lampen door ledlampen
غزرو مصابيحكم بمصابيح LED

Zorg ervoor dat er geen gordijnen of meubels voor de radiator hangen/staan
تأكدوا من عدم وجود ستائر أو أثاث أمام المبرد

Zet de temperatuur in uw woonkamer overdag op maximaal 19°C
حددوا درجة الحرارة في 19°

Gebruik een stekkerdoos met aan/uit knop om elektrische apparaten echt uit te zetten
استعملوا شريط طاقة بزر التشغيل من أجل إيقاف الأجهزة الكهربائية

Plak radiatorfolie achter uw radiatoren
طبقتوا أخطاب المبرد خلف المبرّدات

Zolder العلية

Vraag de monteur die uw CV-ketel controleert om deze op een zuinige stand te zetten
اطلبوا من التقني أن يضبط المكيف الرئيسي في وضع مسموح

Zet de wasmachine pas aan als deze vol is en was op 20 of 30 graden
سبحروا الماكينة فقط عندما تملأها كلياً واحسرو ما بين 20 و 30 درجة

Gebruik de droger zo weinig mogelijk en droog de was buiten of binnen in een ruimte die niet verwarmd wordt
تجنبوا استعمال المجفف وحقنوا المسيل في غرفة غير مكيفة

Badkamer الحمام

Douche niet langer dan vijf minuten
لا تستعملوا الحمام لأكثر من 5 دقائق

Keuken المطبخ

Zet uw koelkast niet in de zon of naast een radiator en ontdoei de vriezer regelmatig
لا تسمرو الثلاجة في الشمس أو قرب المكيف و أديروا المجمّد بانتظام

Zet de vaatwasser pas aan als deze vol is en gebruik de eco-stand
استعملوا غسالة الصحون عندما تملأها عن آخرها واستعملوا إعداد توفير الطاقة

Bespaar gemiddeld € 175 per jaar

اقتصد معدل € 175 في السنة

ENERGIEBOX
Energiebesparing met tips

Saving energy is easy with the tips below. By following the tips with an X you will save the most energy. More information and an explanation of the tips can be found in the report.

اقتصدوا الطاقة بكل سهولة بتتباع الخطوات التالية. بمتتباع الخطوات التي امامها علامة X ستقتصدون طاقة أكثر. معلومات و شرح مفصّل للخطوات في التقرير الّتي.

Facade / Cephe

Leave vents open or open the window for 5 to 10 minutes every day
Her gün 5 ile 10 dakika kapı ve pencerelerinizi açarak evinizde havalandırma veya havalandırma aygıtlarını açık bırakın

Install a letterbox brush and hang a curtain at the front door
Bir posta deliği fırçası takın ve ön kapıya bir perde asın

Place weatherstrips on doors and windows that do not close properly
Dişgin kapıyımayan kapı ve pencerelere tasdik şeritler (tochtstrips) uygulaması yapın

Bedroom / Yatak odası

Only heat rooms where someone is present and close the doors
Sadece birinin bulunduğu odaları ısıtın ve kapıları kapatın

Living room / Oturma odası

Replace your lightbulbs with LED bulbs
Ampulleriniz LED ampullerle değiştirin

Make sure that there are no curtains or furniture in front of the radiator
Radyatörün önünde perde veya mobilya varsa kaldırın, radyatörün vermiş olduğu sıcaklığı engellemesin

Set the temperature in your living room to a maximum of 19°C during the day
Gündüz oturma odanızın sıcaklığını maksimum 19 dereceye ayarlayın

Use a power strip with an on/off switch to actually turn off electrical appliances
Elektrikli cihazları gerçekten kapatmak için on/off anahtarı taşıyan bir anahtarlı uzama kablosu kullanın

Apply radiator foil behind your radiators
Radyatörlerin arkasına radyatör folyosu yapıştırın

Attic / Çatı katı

Ask your service technician to set your central heating boiler correctly
Servis teknisyeninizden kombiınızı ekonomik olarak ayarlatmasını isteyin

Only turn on the washing machine when it is full and wash at 20 or 30 degrees
Çamaşır makinesini sadece doluyken çalıştırın ve 20 veya 30 derecede yıkayın

Use the dryer as little as possible and dry the laundry outside or inside in an unheated room
Kurutma makinesini mümkün olduğunca az kullanın ve çamaşırın dışarıda veya içeride ısıtılmayan bir odada kurutun

Bathroom / Banyo

Do not shower for more than five minutes
Beş dakikadan fazla duş almayın

Kitchen / Mutfak

Do not place your refrigerator in the sun or next to a radiator and defrost the freezer regularly
Buzdolabınızı güneş gören bir yere veya radyatör yanına koymayın ve düzenli olarak dondurucuyu buzunu çözdürün

Only turn on the dishwasher when it is full and use the energy-saving setting
Bulaşık makinesini yalnızca doluyken çalıştırın ve eco modunu kullanın

Save € 175,- on average per year

Yılda ortalama 175 € tasarruf edebilirsiniz

6.2 Croatian new “Energy Savings Handbook” targeting owners, landlords and tenants

DOOR, a partner from the ENPOR project, has developed a new version of the *Energy Savings Handbook* where readers can find various ways to reduce their energy bills and invest in RES and energy efficiency. The handbook, available in Croatian, is freely accessible and available to anyone interested. Its goal is to assist citizens in reducing their energy bills and to improve their living conditions. When compared to the overall living expenses, particular savings may not appear significant, but combined, they can make up a large percentage of a household’s income.

8 PUBLICATIONS

8.1 Scientific Publications by the ENPOR Consortium

Scientific publications of the ENPOR Project were read, downloaded or cited altogether 8514 times, indicating a high scientific interest.

1. [How is gender understood and addressed within the energy efficiency policy landscape of Europe's private rented sector? \(2023\)](#)

Authors: M. Burbidge, D. Papantonis, A. Apostoliotis, S. Bouzarovski, S. Petrova, A. Flamos,

This report combines an in-depth review of academic and grey literature, an analysis of existing energy efficiency policies targeting the Private Rented Sector (PRS) and a primary scoping survey of stakeholders to generate a series of targeted policy recommendations to address the gender dimension in European energy efficiency policy. It should be noted that this report follows the definition of gender put forward by Robinson et al. (2023); gender is not a binary or discrete category, but intersects with and is constructed through "other forms of social difference, such as class, ethnicity, race, disability, sexuality and age", which shapes social relations in unequal ways (Robinson, Simcock and Petrova, 2023).

Published on Zenodo

DOI 10.5281/zenodo.10148686

2. [How to improve energy efficiency policies to address energy poverty? Literature and stakeholder insights for private rented housing in Europe \(2022\)](#)

Authors: Dimitris Papantonis, Dimitra Tzani, Manon Burbidge, Vassilis Stavrakas, Stefan Bouzarovski, Alexandros Flamos

This ENPOR paper sheds light on structural factors, that serve as barriers and solutions, to the implementation of energy efficiency policies in the private rented sector across Europe. Through an in-depth desk research and a European-wide survey on relevant stakeholders and field experts, the authors deliver a holistic assessment of these barriers and possible solutions, aiming to provide key implications to improve energy efficiency and tackle energy poverty.

Published in the Elsevier Energy Research & Social Science journal

<https://doi.org/10.1016/j.erss.2022.102832>

3. [The Long-Term Effects of Using the Energy Box on Energy Poor Households in the Private Rental Sector \(2022\)](#)

Authors: [B. E. Weber](#), [N. Vrieling](#), [M. G. Rietbergen](#)

This paper explores the long-term effects of the Energy Box trajectory on households in the private rental sector, specifically households experiencing energy poverty. The concept of energy poverty has been getting increasing attention among policymakers over the past few years. In the Netherlands, as far as we know, there are no national policies on alleviating energy poverty, which negatively impacts energy-poor households.

Published in: International Journal of Energy and Environmental Engineering Vol:17, No:2, 2023

<https://publications.waset.org/10012964/the-long-term-effects-of-using-the-energy-box-on-energy-poor-households-in-the-private-rental-sector-in-the-netherlands>

4. [Shining a light on energy poverty in the European private rented sector \(2022\)](#)

This Paper examines current and historical disparities in energy poverty between the EU's PRS tenants and the general population by analysing a variety of quantitative indicators which reflect different dimensions of energy poverty.

Published in: eceee Conference Proceedings 2022

https://www.eceee.org/library/conference_proceedings/eceee_Summer_Studies/2022/7-policies-and-programmes-for-better-buildings/shining-a-light-on-energy-poverty-in-the-european-private-rented-sector/

5. [The Diversity Penalty: Domestic energy injustice and ethnic minorities in the United Kingdom \(2022\)](#)

This paper examines the relationships between ethnicity and end-use energy injustices in the United Kingdom, focusing on the drivers and experiences of fuel poverty and energy vulnerability among ethnic minorities. In response to a systematic lack of research, evidence and debate, we use evidence from a combination of sources: online open-ended interviews with professionals in the energy and housing sectors, the Ethnicity Boost survey on energy market engagement undertaken by Citizens Advice, and secondary data from think tanks and government bodies in the energy and housing sectors.

Published in: Energy Research & Social Science Volume 91, September 2022, 102716

<https://doi.org/10.1016/j.erss.2022.102716>

6. [Injustices at the air-energy nexus \(2022\)](#)

This article maps the socio-technical interconnections between atmospheric systems, on the one hand, and the infrastructural networks associated with the extraction, production, transport and consumption of energy resources, on the other hand. The exchanges, interdependencies and injustices that arise at this interface can broadly be understood as the 'air-energy nexus'. Despite energy inequalities almost always being entangled with some form of atmospheric injustice, their intersection has rarely been articulated to date.

Published in: Environment and Planning Volume 1, Issue 2-4, June-December 2022, Pages 168-186

<https://doi.org/10.1177/26349825221123574>

7. [Decarbonisation of the Polish residential sector between the 1990s and 2021: A case study of policy failures](#) (Energy Policy, 2022 – not yet open access)

8. [Energy Justice Handbook](#) (2022, restricted access)

Published: 09 May 2023, Print ISBN: 9781839102950, Edward Elgar Publishing 2023

Editors: Stefan Bouzarovski, Sara Fuller, and Tony Reames

Offering a unique and critical perspective on energy justice, this Handbook delves into an emerging field of inquiry encapsulating multiple strands of scholarship on energy systems. Covering key topics including generation, transmission, distribution and demand, it explores fundamental questions surrounding policy, climate change, security and social movements.

<https://doi.org/10.4337/9781839102967>

9. [Just transitions: A political ecology critique](#) (Antipode) (2022)

Author: Stefan Bouzarovski

“Green deals” to promote socially inclusive decarbonisation have captured the imagination of public intellectuals and advocates across the political spectrum. Such programmes are often premised upon the concept of “just transitions”, which aims to reconcile environmental and social concerns in the movement towards a low-carbon future. I respond to some of the underlying tensions that underpin dominant discourses in this domain by foregrounding collective, disruptive, and non-capitalist forms of infrastructural transformation in the energy domain

Published in: Antipode, Volume 54, Issue 4, July 2022, Pages 1003-1020

<https://doi.org/10.1111/anti.12823>

10. [Energy and labour: Thinking across the continuum](#) (Progress in Human Geography, 2022)

Author: Stefan Bouzarovski

Metabolisms of energy in society and space are predicated upon human labour, in ways that are often poorly recognized in relation to the global climate challenge. I synthesize and interrogate existing scholarship on the relationship between energy and labour across different spatio-temporal contexts, so as to reveal the overlapping networks that bind energy workers, consumers and producers. Drawing upon geographical, feminist, social practice and political ecology insights, I propose a research agenda that foregrounds the role of social reproduction—through capital-labour regimes and the gendered division of labour—in shaping the circulation and contestation of energy use.

Published in: Progress in Human Geography 2022, Vol. 46(3) 753–774

<https://doi.org/10.1177/03091325211051478>

11. [Mapping European projects- Energy citizenship and energy poverty \(ENPOR included, 2022\)](#)

Protecting vulnerable citizens and tackling energy poverty have become specific policy priorities in the legislative package Clean Energy for All Europeans, and have been also recently strengthened with the Recommendation on Energy Poverty issued as part of the Renovation Wave package. In these documents, energy poverty is generally defined in terms of high-energy prices, low income and inefficient housing. Therefore, retrofit measures, funding mechanisms and targeted protection practices are often identified as a way to mitigate energy poverty. However, it is only when vulnerable citizens get their different needs, rights and experiences recognized, and have access to the energy decision-making process, that the energy transition is likely to leave no one behind. In this regard, energy citizenship represents a way not only to address energy poverty and vulnerability, but also to promote energy justice. However, its potential is still under-researched. This mapping exercise contributes to the recent emerging literature on energy citizenship by looking at the best practices offered by European projects.

European Commission, Joint Research Centre, Mapping European projects, Energy citizenship and energy poverty, Publications Office of the European Union, 2022,

<https://data.europa.eu/doi/10.2760/04963>

12. [Report on the analysis of Private Rented Sector policies and measures \(final version\): Deliverable 2.7 ENPOR Project](#)

Authors: M. Burbidge, D. Papantonis, A. Apostoliotis, S. Bouzarovski, S. Petrova, A. Flamos,

This report analyses and assesses policies and measures that address energy poverty in the private rented sector (PRS) across Europe. We review intervention strategies aimed at reducing energy poverty in private rented properties, particularly scrutinising policies targeting vulnerable households in the sector. The overarching objective is to investigate the content, aim, and structure of PRS policies in this domain, noting key patterns in the coverage, distribution, and delivery of such initiatives. As a result, the review identifies some of the wider structural challenges in the type of support currently available to energy poor households. Policies have been identified on the basis of publicly available, non-confidential and nonpersonal information, collected between January 2021 and January 2023. Data was compiled by experts from the ENPOR consortium, as well as from submissions via the ENPOR Energy Poverty Dashboard (EPD) portal. Although 122 policies appear on the EPD (as of 31st March 2023), 114 are included in this analysis, as a result of insufficiently available information for the remaining measures. The resulting dataset is a diverse set of measures operating at different geographic and governance scales, and with highly variegated programmatic objectives.

Energy Poverty Advisory Hub Report: Tackling energy poverty through local actions – Inspiring cases from across Europe - This report, *available in 24 languages*, displays a series of 24 inspirational cases of how energy poverty can be alleviated at the local level. ENPOR was selected and is included as one of the inspiring cases: https://energy-poverty.ec.europa.eu/discover/practices-and-policies-toolkit/publications/epah-report-tackling-energy-poverty-through-local-actions-inspiring-cases-across-europe_en.

9**CONCLUSION**

ENPOR news were distributed via ENPOR newsletters and partner newsletters reaching 13,598 recipients exceeding the KPI of 5,000 recipients, reaching 272 % of the target value. The consortium organised and participated in over 150 events, and contributed to scientific and policy discussions online and offline. ENPOR digital materials reached ca. 20,000 people via partners websites, and reached almost 100.000 impressions on ENPOR social media. The ENPOR website engaged stakeholders over 44,000 times and printed online materials are being used beyond the project with the Austrian energy saving tips being printed and distributed to 200.000 citizens and advisors. ENPOR engaged a variety of stakeholders and collaborated actively with all sister projects and organised several events together with the Energy Poverty Advisory Hub and the Covenant of Mayors, submitted recommendations on national and local level to policy makers and impacted national policy measures such as the Greek or Estonian Renovation Grant, the extended heating advice for Stromsparcheck or the Energiebox, even contributed to the creation of a new training programme on Social Energy Advice in Austria. We are confident, that despite the difficulties of the COVID pandemic, ENPOR made a considerable impact.
